A1 - SEM FIXAÇÃO

Método empregue em peças de um peso considerável. Consiste no posicionamento da peça no local exacto, sendo necessários meios de movimentação para a sua colocação.

Este método se utiliza para piezas de peso considerable. Consiste en colocar la pieza en el lugar exacto, sin necesidad de medios de movimiento para colocarla.

Méthode utilisée sur des pièces de poids considérable. Il consiste à positionner la pièce à l'endroit exact, moyen de déplacement nécessaire pour sa mise en place.

Method used on pieces of considerable weight. It consists of positioning the piece in the exact place, with necessary means of movement for its proper placement.

Linha de Solo

A2 - VARÃO NERVURADO

Método convencional de fixação permanente. Consiste em um ou mais varões nervurados soldados à peça que, serão fixos directamente à fundação de betão.

Método convencional de anclaje permanente. Consiste en una o varias barras nervadas soldadas a la parte que se fijará directamente a la cimentación de hormigón.

Méthode conventionnelle de fixation permanente. Il est constitué d'une ou plusieurs tiges nervurées soudées à la pièce qui seront fixées directement à la fondation en béton.

Conventional method of permanent fastening. It consists of one or more ribbed rods welded to the piece that will be fixed directly to the concrete foundation.

Linha de Solo

A3 - VARÃO ROSCADO, PORCA E ANILHA

Método convencional de fixação. A peça terá furação, permitindo a sua fixação com recurso a varão roscado, porca e anilha em inox (fornecidas juntamente com a peça). Este método permite a remoção da peça.

Método convencional de fijación. La pieza dispondrá de perforación, permitiendo su fijación mediante una varilla roscada, tuerca y arandela (suministrada con la pieza). Este método permite la retirada de la pieza.

Méthode de fixation conventionnelle. La pièce aura des trous, permettant sa fixation à l'aide d'une tige filetée, d'une écrou et d'une rondelle en acier inoxydable (fournies avec la pièce). Cette méthode permet au enlèvement de pièce.

Conventional method of fastening. The piece will have holes, allowing its fastening with the threaded rod, nut and stainless steel washer (supplied together with the piece). This method allows for the part to be removed.

Linha de Solo

A4 - BUCHA METÁLICA - CABEÇA EMBEBER

Método convencional de fixação. A peça terá furação escariada, permitindo a sua fixação com recurso a bucha metálica em inox (fornecida juntamente com a peça). Este método permite uma fácil remoção da peça.

Método de fijación convencional. La pieza tendrá agujeros avellanados, lo que permitirá su fijación mediante un casquillo metálico de acero inoxidable (suministrado con la pieza). Este método permite retirar fácilmente la pieza.

Méthode de fixation conventionnelle. La pièce aura des trous fraisés, permettant sa fixation à l'aide de la cheville en acier inoxydable (fournie avec la pièce). Cette méthode permet une retrait facile de pièce.

Conventional method of fastening. This piece will have countersunk holes, allowing its fastening using the metal dowel (supplied together with the piece). This method allows for easy removal of the part.

Linha de Solo

A5 - FIXAÇÃO DIRETA - DEFORMAÇÃO

Método de fixação permanente. Consiste na fixação direta da peça directamente à fundação de betão. É feita uma ligeira deformação na região da peça que fica encastrada no solo para prevenir eventuais remoções ilícitas.

Método de fijación permanente. Consiste en la fijación directa de la pieza directamente a la cimentación de hormigón. Se realiza una ligera deformación en la región de la pieza que se incrusta en el suelo para evitar eventuales extracciones ilícitas.

Méthode de fixation permanente. Il consiste en la fixation directe de la pièce directement sur la fondation en béton. Une légère déformation est effectuée dans la région de la pièce qui est enfoncée dans le sol pour empêcher tout enlèvement illicite.

Permanent fastening method. It consists of the direct fastening of the part directly to the concrete foundation. A slight deformation is made in the part of the piece that is embedded in the ground to prevent any illicit removal.

Linha de Solo

A6 - FIXAÇÃO DIRETA - NEGATIVO

Consiste na fixação direta de um negativo da peça directamente à fundação de betão. A peça será posteriormente fixa ao negativo.

Consiste en fijar directamente un negativo de la pieza directamente a la cimentación de hormigón. Posteriormente se fijará la pieza al negativo.

Consiste à fixer directement un négatif de la pièce directement sur la fondation en béton. La pièce sera ensuite fixée au négatif.

It consists of directly fixing a negative of the part directly to the concrete foundation. The piece will later be fixed to the negative.

Linha de Solo

A7 - CHUMBADOURO - VARÃO NERVURADO

É composto por um ou mais varões nervurados soldados a elementos metálicos que serão fixos directamente à fundação de betão. A peça será, à posteriori, fixa ao chumbadouro através de parafusos em inox.

Consiste en una o más barras nervadas soldadas a elementos metálicos que se fijarán directamente a la cimentación de hormigón. Posteriormente se fijará la pieza al anclaje mediante tornillería de acero inoxidable.

Est composé d'une ou plusieurs versions nervurées soudées à éléments métalliques qui seront fixés directement à la fondation de béton. La pièce sera, a posteriori, fixée à l'ancrage à l'aide vis en acier inoxydable.

It consists of one or more ribbed rods welded to metal elements that will be fixed directly to the concrete foundation. The piece will later be fixed to the anchor using stainless steel screws.

Linha de Solo

A8 - ABRAÇADEIRA METÁLICA

Método empregue em peças que serão fixas a postes. A peça terá dois a três rasgos para permitir que a abraçadeira metálica, fixe a peça ao respectivo poste.

Método utilizado en piezas que serán fijadas a postes. La pieza tendrá de dos a tres ranuras para permitir que la abrazadera metálica fije la pieza al respectivo poste.

Méthode utilisée dans les parties qui seront fixées aux poteaux. La pièce aura deux à trois fentes pour permettre à la pince métallique de fixer la pièce au poteau respectif.

Method used in parts that will be fixed to poles. The piece will have two to three slots to allow the metal clamp to secure the piece to the respective post.

Linha de Solo
